Re: *Touhy* Request for Employee Testimony - South Dayton Dump

Dear Mr. Kaplan:

This letter serves as a *Touhy* Request to the United States Environmental Protection Agency - Region 5 ("U.S. EPA") from the Dayton Power & Light Company ("DP&L") pursuant to 40 C.F.R. § 2.401 through 2.406.

Attached please find subpoenas issued to three U.S. EPA employees—Karen Cibuskis, Leslie Patterson, and Steven Renninger—whose testimony is essential to litigation concerning the South Dayton Dump, as described in more detail below. These individuals have been deeply involved in the ongoing matter involving the South Dayton Dump in Dayton, Ohio, Southern District of Ohio Case No. 3:15-cv-115. Without their testimony, key facts and issues alleged by the more than 20 potentially responsible parties ("PRPs"), including three plaintiffs who have brought this suit due to entering settlement agreements with U.S. EPA, will go unrecorded or potentially be misstated.

The Lawsuit

The South Dayton Dump and Landfill is a former disposal area for industrial and municipal waste. The site is approximately 80 acres. Waste was deposited at the South Dayton Dump from the early 1940s until 1996. Plaintiffs—Hobart Corporation, Kelsey-Hayes Company, and NCR Corporation—are PRPs who originally filed suit against DP&L and a host of other PRPs under CERCLA, 42 U.S.C. § 9607 and 9613, asserting claims of cost recovery and contribution, declaratory judgment, and unjust enrichment. Plaintiffs were identified as PRPs under CERCLA because they either generated the hazardous substances disposed of at the South Dayton Dump, or arranged for disposal or transport for disposal of hazardous substances there.

Robert A. Kaplan
February 7, 2017
Page 2

As you may already know, in August of 2006, Plaintiffs entered into an Administrative Settlement and Order on Consent with U.S. EPA (“2006 ASAOC”). In May of 2010, Plaintiffs sued several other PRPs, including DP&L, seeking cost recovery and contribution, Southern District of Ohio Case No. 3:10-cv-195. Plaintiffs joined additional PRPs in June of 2012 (Case No. 3:12-cv-213). Both of these cases were eventually dismissed by the Southern District of Ohio once it was determined that Plaintiffs were limited to a contribution action pursuant to CERCLA § 113(f)(3)(B), and that time for bringing that suit had summarily run.

On April 5, 2013, Plaintiffs entered into an ASAOC for Removal Action (“2013 ASAOC”) with U.S. EPA, in connection with certain “vapor intrusion risks” in and around the South Dayton Dump. Subsequently, on June 11, 2016, Plaintiffs entered into an ASAOC for performance of a remedial investigation and feasibility study (“RI/FS”) in and around the South Dayton Dump (“2016 ASAOC”). Given their newest agreements with U.S. EPA, and overcoming their previous statute of limitations failures, Plaintiffs were then able to file the current matter against DP&L and various other PRPs. Although Plaintiffs asserted the same exact four causes of action asserted in their first two cases, the claims at issue in the present matter arise out of the 2013 and 2016 ASAOCs. In February of 2014, the Southern District of Ohio dismissed the cost recovery claim brought under § 107(a) of CERCLA, and Plaintiffs have since proceeded with their § 113(f)(3)(B) contribution claim.

In their most recent Complaint, Plaintiffs rely on their 2013 and 2016 ASAOCs with U.S. EPA to support standing in bringing their claims. They allege that DP&L contributed waste to the South Dayton Dump, both in the form of deposited waste and potentially through migrating exposure from the DP&L Facility on Dryden Road. Plaintiffs, thus far, have used deposition testimony from former South Dayton Dump employees to justify their claims, with little other evidence produced against DP&L.

Conversations with and input from U.S. EPA personnel requested for deposition herein not only underlie Plaintiffs’ claim of standing, but have affected the course of this litigation. Clarity regarding U.S. EPA’s positions and facts exchanged with U.S. EPA is both in U.S. EPA’s interest, and essential to the fair adjudication of Plaintiffs’ claims.

Requirements for Touhy Request Under 40 C.F.R. § 2.401

This Touhy request complies with the regulations set forth in 40 C.F.R. § 2.403 (“Procedures When Voluntary Testimony is Required”). That section requires the request is in writing, states the nature of the testimony requested, and why such deposition testimony is in the interest of U.S. EPA.

Robert A. Kaplan
February 7, 2017
Page 3

Nature of the Testimony Requested

Ms. Karen Cibulskis
US EPA – Region 5
Former Remedial Project Manager
Chicago, Illinois

Ms. Cibulskis formerly functioned as the Remedial Project Manager for the South Dayton Dump from approximately 2000 until 2012. DP&L anticipates that her deposition testimony would be based on her involvement with the site and be based on factual realities of that involvement, as opposed to her technical expertise in this area. As Remedial Project Manager, Ms. Cibulskis was responsible for: representation of U.S. EPA as the lead federal agency at the South Dayton Dump; accountability for planning, safety, scoping, budget, quality, and project schedule as well as accounting for stakeholder expectations and compliance with work tasks governed by state and federal regulations; and managing the overall project team, including budget and planning, scoping, milestones, and reporting to senior management. For the South Dayton Dump, Ms. Cibulskis was integrally involved in environmental investigations, decisions, data collection, establishing boundaries of the project, its schedule, and objectives. *See, e.g.* attached correspondence copying Ms. Cibulskis, related to U.S. EPA employing an investigator and corresponding with potential witnesses related to the South Dayton Dump. This role has been crucial to Plaintiffs, and testimony from Ms. Cibulskis is essential to the proper and complete adjudication of this matter.

Ms. Leslie Patterson
US EPA - Region 5
Current Remedial Project Manager
Chicago, Illinois

Ms. Patterson took over as Remedial Project Manager for the South Dayton Dump in 2012. Her role and duties track those of Ms. Cibulskis but for a different time period. Ms. Patterson has been involved in decision making at the South Dayton Dump, communicating priorities and working closely with Plaintiffs. *See, e.g.*, attached meeting minutes for meeting between Ms. Patterson and other stakeholders involved at the South Dayton Dump. DP&L anticipates that testimony from Ms. Patterson would involve her work at the South Dayton Dump, and any contact between U.S. EPA and Plaintiffs since the lodging of the 2013 ASOC.

Mr. Steven Renninger
US EPA On-Scene Coordinator
Emergency Response Branch
Cincinnati, Ohio

Robert A. Kaplan
February 7, 2017
Page 4

Mr. Renninger functions as the on-scene coordinator for the South Dayton Dump. In that role, he has been responsible for monitoring and directing response, as well as coordinating all federal efforts with, and providing support and information to, local, state, and regional response communities. Key duties for Mr. Renninger as on-scene coordinator include assessment, monitoring, response assistance, and evaluation at the South Dayton Dump. Mr. Renninger has also been instrumental in corresponding and coordinating with Plaintiffs in the present matter, *see* for example the attached meeting minutes between Mr. Renninger, Ohio EPA, and consultant for Plaintiffs, Conestoga-Rovers and Associates. DP&L anticipates testimony from Mr. Renninger on all these topics as they relate to the South Dayton Dump. Mr. Renninger has been integrally involved in investigative and response efforts at the South Dayton Dump. His testimony is crucial to presenting the complete picture of events and activities that have taken place, as well as the technical aspects of U.S. EPA actions at and involving the South Dayton Dump. This testimony is not available from any other source and is crucial to all claims involved in the present matter.

Deposition Testimony of the Requested Individuals Is In The Interest of U.S. EPA¹

For a number of reasons, the testimony sought by DP&L is in the interest of U.S. EPA.

- (1) The requested testimony is discoverable and appropriately tailored, as it is directly relevant to the claims in this case, and is neither confidential nor privileged. DP&L seeks only factual testimony from the individuals subpoenaed in this matter, and has only subpoenaed the most essential individuals to testify.
- (2) The individuals named as potential deponents first arose as a result of Plaintiffs production of their Initial Witness List in the present litigation in November 2016. *See* attached Witness List at Nos. 27, 94, and 105. There, Plaintiffs named five U.S. EPA employees, including the three named here. Plaintiffs have since amended their witness list to remove the names of all current and former U.S. EPA employees; however it is still apparent that Plaintiffs have used their communications and interactions with U.S. EPA as the foundation for the present litigation. Moreover, Plaintiffs offer no reasoning for their change in stance on this point. The employees named here remain relevant and essential to the adjudication of this matter, as originally recognized by Plaintiffs.
- (3) U.S. EPA has repeatedly demonstrated an interest in the South Dayton Dump and this litigation, making the testimony appropriate. U.S. EPA has been engaged with the South Dayton Dump since the year 2000, or earlier. The present litigation would serve to potentially determine the allocation outcome between all PRPs in question as to the vapor

¹ Attached hereto is Mr. James Morris' letter outlining several concerns of U.S. EPA. This Touhy request addresses each concern, in addition to demonstrating why testimony of the requested individuals is in the interest of U.S. EPA, as referenced in 40 C.F.R. § 2.403.

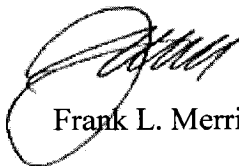

Robert A. Kaplan
February 7, 2017
Page 5

intrusion issue, and perhaps any future cleanup at the South Dayton Dump. Such resolution is clearly beneficial to U.S. EPA. Moreover, time and again, U.S. EPA has demonstrated its interest in the litigation in question through its formal and informal participation in this matter. For example, Thomas Nash, formerly of U.S. EPA, attended and participated in the deposition of Horace Boesch (a deponent upon which Plaintiffs have based much weight) in December of 2011 in Dayton, Ohio. U.S. EPA has also continued to contact PRPs in this matter, encouraging them to cooperate with Plaintiffs and/or enter into settlement agreements.

- (4) Testimony available to all parties avoids potential inconsistencies and misstatement of U.S. EPA's factual information that may occur otherwise. In this regard, only Plaintiffs have been privy to the factual findings of U.S. EPA through their various communications to date. The requested testimony remedies this issue, as it provides an opportunity for U.S. EPA personnel to ensure essential information is available in an impartial manner.
- (5) The subpoenaed testimony is necessary to the further resolution of this case. The employees in question have already spent much time on the ASAOs and the site in general. To forego the factual testimony on these topics is to the detriment of DP&L, the other PRPs, and even Plaintiffs. Indeed, these individuals' testimony may aid the resolution of the case. Their participation, for this reason would be beneficial to all parties, including U.S. EPA.
- (6) The benefits of permitting the requested testimony outweigh demands on these individuals' time. To that end, DP&L is more than willing to come to the U.S. EPA Region 5 Office in Chicago, Illinois to complete this testimony in the most efficient manner possible with as little disruption to normal work activities as is practicable. Moreover, as individuals continuously engaged with administrative settlements and matters clearly pertaining to CERCLA, participation from the three employees identified is not out of the realm of their stated job function.

I hope you will agree the testimony requested herein should be permitted. I am available to discuss this request at your earliest convenience, and I respectfully request a determination as soon as possible in light of upcoming court deadlines in the litigation.

Best regards,

Frank L. Merrill

Additional information regarding attempted service, etc.:

Federal Rule of Civil Procedure 45 (c), (d), (e), and (g) (Effective 12/1/13)

(c) Place of Compliance.

(1) For a Trial, Hearing, or Deposition. A subpoena may command a person to attend a trial, hearing, or deposition only as follows:

- (A) within 100 miles of where the person resides, is employed, or regularly transacts business in person; or
- (B) within the state where the person resides, is employed, or regularly transacts business in person, if the person
 - (i) is a party or a party's officer; or
 - (ii) is commanded to attend a trial and would not incur substantial expense.

(2) For Other Discovery. A subpoena may command:

- (A) production of documents, electronically stored information, or tangible things at a place within 100 miles of where the person resides, is employed, or regularly transacts business in person; and
- (B) inspection of premises at the premises to be inspected.

(d) Protecting a Person Subject to a Subpoena; Enforcement.

(1) Avoiding Undue Burden or Expense; Sanctions. A party or attorney responsible for issuing and serving a subpoena must take reasonable steps to avoid imposing undue burden or expense on a person subject to the subpoena. The court for the district where compliance is required must enforce this duty and impose an appropriate sanction—which may include lost earnings and reasonable attorney's fees—on a party or attorney who fails to comply.

(2) Command to Produce Materials or Permit Inspection.

(A) Appearance Not Required. A person commanded to produce documents, electronically stored information, or tangible things, or to permit the inspection of premises, need not appear in person at the place of production or inspection unless also commanded to appear for a deposition, hearing, or trial.

(B) Objections. A person commanded to produce documents or tangible things or to permit inspection may serve on the party or attorney designated in the subpoena a written objection to inspecting, copying, testing, or sampling any or all of the materials or to inspecting the premises—or to producing electronically stored information in the form or forms requested. The objection must be served before the earlier of the time specified for compliance or 14 days after the subpoena is served. If an objection is made, the following rules apply:

- (i) At any time, on notice to the commanded person, the serving party may move the court for the district where compliance is required for an order compelling production or inspection.
- (ii) These acts may be required only as directed in the order, and the order must protect a person who is neither a party nor a party's officer from significant expense resulting from compliance.

(3) Quashing or Modifying a Subpoena.

(A) When Required. On timely motion, the court for the district where compliance is required must quash or modify a subpoena that:

- (i) fails to allow a reasonable time to comply;
- (ii) requires a person to comply beyond the geographical limits specified in Rule 45(c);
- (iii) requires disclosure of privileged or other protected matter, if no exception or waiver applies; or
- (iv) subjects a person to undue burden.

(B) When Permitted. To protect a person subject to or affected by a subpoena, the court for the district where compliance is required may, on motion, quash or modify the subpoena if it requires:

(i) disclosing a trade secret or other confidential research, development, or commercial information; or

(ii) disclosing an unretained expert's opinion or information that does not describe specific occurrences in dispute and results from the expert's study that was not requested by a party.

(C) Specifying Conditions as an Alternative. In the circumstances described in Rule 45(d)(3)(B), the court may, instead of quashing or modifying a subpoena, order appearance or production under specified conditions if the serving party:

- (i) shows a substantial need for the testimony or material that cannot be otherwise met without undue hardship; and
- (ii) ensures that the subpoenaed person will be reasonably compensated.

(e) Duties in Responding to a Subpoena.

(1) Producing Documents or Electronically Stored Information. These procedures apply to producing documents or electronically stored information:

(A) Documents. A person responding to a subpoena to produce documents must produce them as they are kept in the ordinary course of business or must organize and label them to correspond to the categories in the demand.

(B) Form for Producing Electronically Stored Information Not Specified. If a subpoena does not specify a form for producing electronically stored information, the person responding must produce it in a form or forms in which it is ordinarily maintained or in a reasonably usable form or forms.

(C) Electronically Stored Information Produced in Only One Form. The person responding need not produce the same electronically stored information in more than one form.

(D) Inaccessible Electronically Stored Information. The person responding need not provide discovery of electronically stored information from sources that the person identifies as not reasonably accessible because of undue burden or cost. On motion to compel discovery or for a protective order, the person responding must show that the information is not reasonably accessible because of undue burden or cost. If that showing is made, the court may nonetheless order discovery from such sources if the requesting party shows good cause, considering the limitations of Rule 26(b)(2)(C). The court may specify conditions for the discovery.

(2) Claiming Privilege or Protection.

(A) Information Withheld. A person withholding subpoenaed information under a claim that it is privileged or subject to protection as trial-preparation material must:

- (i) expressly make the claim; and
- (ii) describe the nature of the withheld documents, communications, or tangible things in a manner that, without revealing information itself privileged or protected, will enable the parties to assess the claim.

(B) Information Produced. If information produced in response to a subpoena is subject to a claim of privilege or of protection as trial-preparation material, the person making the claim may notify any party that received the information of the claim and the basis for it. After being notified, a party must promptly return, sequester, or destroy the specified information and any copies it has; must not use or disclose the information until the claim is resolved; must take reasonable steps to retrieve the information if the party disclosed it before being notified; and may promptly present the information under seal to the court for the district where compliance is required for a determination of the claim. The person who produced the information must preserve the information until the claim is resolved.

(g) Contempt.

The court for the district where compliance is required—and also, after a motion is transferred, the issuing court—may hold in contempt a person who, having been served, fails without adequate excuse to obey the subpoena or an order related to it.

Additional information regarding attempted service, etc.:

Federal Rule of Civil Procedure 45 (c), (d), (e), and (g) (Effective 12/1/13)

(c) Place of Compliance.

(1) For a Trial, Hearing, or Deposition. A subpoena may command a person to attend a trial, hearing, or deposition only as follows:

- (A) within 100 miles of where the person resides, is employed, or regularly transacts business in person; or
- (B) within the state where the person resides, is employed, or regularly transacts business in person, if the person
 - (i) is a party or a party's officer; or
 - (ii) is commanded to attend a trial and would not incur substantial expense.

(2) For Other Discovery. A subpoena may command:

- (A) production of documents, electronically stored information, or tangible things at a place within 100 miles of where the person resides, is employed, or regularly transacts business in person; and
- (B) inspection of premises at the premises to be inspected.

(d) Protecting a Person Subject to a Subpoena; Enforcement.

(1) Avoiding Undue Burden or Expense; Sanctions. A party or attorney responsible for issuing and serving a subpoena must take reasonable steps to avoid imposing undue burden or expense on a person subject to the subpoena. The court for the district where compliance is required must enforce this duty and impose an appropriate sanction—which may include lost earnings and reasonable attorney's fees—on a party or attorney who fails to comply.

(2) Command to Produce Materials or Permit Inspection.

(A) Appearance Not Required. A person commanded to produce documents, electronically stored information, or tangible things, or to permit the inspection of premises, need not appear in person at the place of production or inspection unless also commanded to appear for a deposition, hearing, or trial.

(B) Objections. A person commanded to produce documents or tangible things or to permit inspection may serve on the party or attorney designated in the subpoena a written objection to inspecting, copying, testing, or sampling any or all of the materials or to inspecting the premises—or to producing electronically stored information in the form or forms requested. The objection must be served before the earlier of the time specified for compliance or 14 days after the subpoena is served. If an objection is made, the following rules apply:

- (i) At any time, on notice to the commanded person, the serving party may move the court for the district where compliance is required for an order compelling production or inspection.
- (ii) These acts may be required only as directed in the order, and the order must protect a person who is neither a party nor a party's officer from significant expense resulting from compliance.

(3) Quashing or Modifying a Subpoena.

(A) When Required. On timely motion, the court for the district where compliance is required must quash or modify a subpoena that:

- (i) fails to allow a reasonable time to comply;
- (ii) requires a person to comply beyond the geographical limits specified in Rule 45(c);
- (iii) requires disclosure of privileged or other protected matter, if no exception or waiver applies; or
- (iv) subjects a person to undue burden.

(B) When Permitted. To protect a person subject to or affected by a subpoena, the court for the district where compliance is required may, on motion, quash or modify the subpoena if it requires:

(i) disclosing a trade secret or other confidential research, development, or commercial information; or

(ii) disclosing an unretained expert's opinion or information that does not describe specific occurrences in dispute and results from the expert's study that was not requested by a party.

(C) Specifying Conditions as an Alternative. In the circumstances described in Rule 45(d)(3)(B), the court may, instead of quashing or modifying a subpoena, order appearance or production under specified conditions if the serving party:

- (i) shows a substantial need for the testimony or material that cannot be otherwise met without undue hardship; and
- (ii) ensures that the subpoenaed person will be reasonably compensated.

(e) Duties in Responding to a Subpoena.

(1) Producing Documents or Electronically Stored Information. These procedures apply to producing documents or electronically stored information:

(A) Documents. A person responding to a subpoena to produce documents must produce them as they are kept in the ordinary course of business or must organize and label them to correspond to the categories in the demand.

(B) Form for Producing Electronically Stored Information Not Specified. If a subpoena does not specify a form for producing electronically stored information, the person responding must produce it in a form or forms in which it is ordinarily maintained or in a reasonably usable form or forms.

(C) Electronically Stored Information Produced in Only One Form. The person responding need not produce the same electronically stored information in more than one form.

(D) Inaccessible Electronically Stored Information. The person responding need not provide discovery of electronically stored information from sources that the person identifies as not reasonably accessible because of undue burden or cost. On motion to compel discovery or for a protective order, the person responding must show that the information is not reasonably accessible because of undue burden or cost. If that showing is made, the court may nonetheless order discovery from such sources if the requesting party shows good cause, considering the limitations of Rule 26(b)(2)(C). The court may specify conditions for the discovery.

(2) Claiming Privilege or Protection.

(A) Information Withheld. A person withholding subpoenaed information under a claim that it is privileged or subject to protection as trial-preparation material must:

- (i) expressly make the claim; and
- (ii) describe the nature of the withheld documents, communications, or tangible things in a manner that, without revealing information itself privileged or protected, will enable the parties to assess the claim.

(B) Information Produced. If information produced in response to a subpoena is subject to a claim of privilege or of protection as trial-preparation material, the person making the claim may notify any party that received the information of the claim and the basis for it. After being notified, a party must promptly return, sequester, or destroy the specified information and any copies it has; must not use or disclose the information until the claim is resolved; must take reasonable steps to retrieve the information if the party disclosed it before being notified; and may promptly present the information under seal to the court for the district where compliance is required for a determination of the claim. The person who produced the information must preserve the information until the claim is resolved.

(g) Contempt.

The court for the district where compliance is required—and also, after a motion is transferred, the issuing court—may hold in contempt a person who, having been served, fails without adequate excuse to obey the subpoena or an order related to it.

03/06/2017 10:00 am

The deposition will be recorded by this method: Court Reporter

☐ **Production:** You, or your representatives, must also bring with you to the deposition the following documents, electronically stored information, or objects, and must permit inspection, copying, testing, or sampling of the material:

The following provisions of Fed. R. Civ. P. 45 are attached – Rule 45(c), relating to the place of compliance; Rule 45(d), relating to your protection as a person subject to a subpoena; and Rule 45(e) and (g), relating to your duty to respond to this subpoena and the potential consequences of not doing so.

Date: 02/03/2017

CLERK OF COURT

OR

*Signature of Clerk or Deputy Clerk**Attorney's signature*

The name, address, e-mail address, and telephone number of the attorney representing *(name of party)* Defendant,
The Dayton Power and Light Company, who issues or requests this subpoena, are:

Frank L. Merrill, Bricker & Eckler LLP, 100 South Third Street, Columbus, Ohio 43215, fmerrill@bricker.com (614) 227-2300

Notice to the person who issues or requests this subpoena

If this subpoena commands the production of documents, electronically stored information, or tangible things before trial, a notice and a copy of the subpoena must be served on each party in this case before it is served on the person to whom it is directed. Fed. R. Civ. P. 45(a)(4).

Civil Action No. 3:13-cv-115

PROOF OF SERVICE

(This section should not be filed with the court unless required by Fed. R. Civ. P. 45.)

I received this subpoena for *(name of individual and title, if any)* _____
on *(date)* _____.

☐ I served the subpoena by delivering a copy to the named individual as follows: _____

_____ on *(date)* _____; or

☐ I returned the subpoena unexecuted because: _____

Unless the subpoena was issued on behalf of the United States, or one of its officers or agents, I have also
tendered to the witness the fees for one day's attendance, and the mileage allowed by law, in the amount of
\$ _____.

My fees are \$ _____ for travel and \$ _____ for services, for a total of \$ 0.00 .

I declare under penalty of perjury that this information is true.

Date: _____

Additional information regarding attempted service, etc.:

Federal Rule of Civil Procedure 45 (c), (d), (e), and (g) (Effective 12/1/13)

(c) Place of Compliance.

(1) For a Trial, Hearing, or Deposition. A subpoena may command a person to attend a trial, hearing, or deposition only as follows:

- (A) within 100 miles of where the person resides, is employed, or regularly transacts business in person; or
- (B) within the state where the person resides, is employed, or regularly transacts business in person, if the person
 - (i) is a party or a party's officer; or
 - (ii) is commanded to attend a trial and would not incur substantial expense.

(2) For Other Discovery. A subpoena may command:

- (A) production of documents, electronically stored information, or tangible things at a place within 100 miles of where the person resides, is employed, or regularly transacts business in person; and
- (B) inspection of premises at the premises to be inspected.

(d) Protecting a Person Subject to a Subpoena; Enforcement.

(1) Avoiding Undue Burden or Expense; Sanctions. A party or attorney responsible for issuing and serving a subpoena must take reasonable steps to avoid imposing undue burden or expense on a person subject to the subpoena. The court for the district where compliance is required must enforce this duty and impose an appropriate sanction—which may include lost earnings and reasonable attorney's fees—on a party or attorney who fails to comply.

(2) Command to Produce Materials or Permit Inspection.

(A) Appearance Not Required. A person commanded to produce documents, electronically stored information, or tangible things, or to permit the inspection of premises, need not appear in person at the place of production or inspection unless also commanded to appear for a deposition, hearing, or trial.

(B) Objections. A person commanded to produce documents or tangible things or to permit inspection may serve on the party or attorney designated in the subpoena a written objection to inspecting, copying, testing, or sampling any or all of the materials or to inspecting the premises—or to producing electronically stored information in the form or forms requested. The objection must be served before the earlier of the time specified for compliance or 14 days after the subpoena is served. If an objection is made, the following rules apply:

- (i) At any time, on notice to the commanded person, the serving party may move the court for the district where compliance is required for an order compelling production or inspection.
- (ii) These acts may be required only as directed in the order, and the order must protect a person who is neither a party nor a party's officer from significant expense resulting from compliance.

(3) Quashing or Modifying a Subpoena.

(A) When Required. On timely motion, the court for the district where compliance is required must quash or modify a subpoena that:

- (i) fails to allow a reasonable time to comply;
 - (ii) requires a person to comply beyond the geographical limits specified in Rule 45(c);
 - (iii) requires disclosure of privileged or other protected matter, if no exception or waiver applies; or
 - (iv) subjects a person to undue burden.
- (B) When Permitted.** To protect a person subject to or affected by a subpoena, the court for the district where compliance is required may, on motion, quash or modify the subpoena if it requires:

(i) disclosing a trade secret or other confidential research, development, or commercial information; or

(ii) disclosing an unretained expert's opinion or information that does not describe specific occurrences in dispute and results from the expert's study that was not requested by a party.

(C) Specifying Conditions as an Alternative. In the circumstances described in Rule 45(d)(3)(B), the court may, instead of quashing or modifying a subpoena, order appearance or production under specified conditions if the serving party:

- (i) shows a substantial need for the testimony or material that cannot be otherwise met without undue hardship; and
- (ii) ensures that the subpoenaed person will be reasonably compensated.

(e) Duties in Responding to a Subpoena.

(1) Producing Documents or Electronically Stored Information. These procedures apply to producing documents or electronically stored information:

(A) Documents. A person responding to a subpoena to produce documents must produce them as they are kept in the ordinary course of business or must organize and label them to correspond to the categories in the demand.

(B) Form for Producing Electronically Stored Information Not Specified. If a subpoena does not specify a form for producing electronically stored information, the person responding must produce it in a form or forms in which it is ordinarily maintained or in a reasonably usable form or forms.

(C) Electronically Stored Information Produced in Only One Form. The person responding need not produce the same electronically stored information in more than one form.

(D) Inaccessible Electronically Stored Information. The person responding need not provide discovery of electronically stored information from sources that the person identifies as not reasonably accessible because of undue burden or cost. On motion to compel discovery or for a protective order, the person responding must show that the information is not reasonably accessible because of undue burden or cost. If that showing is made, the court may nonetheless order discovery from such sources if the requesting party shows good cause, considering the limitations of Rule 26(b)(2)(C). The court may specify conditions for the discovery.

(2) Claiming Privilege or Protection.

(A) Information Withheld. A person withholding subpoenaed information under a claim that it is privileged or subject to protection as trial-preparation material must:

- (i) expressly make the claim; and
- (ii) describe the nature of the withheld documents, communications, or tangible things in a manner that, without revealing information itself privileged or protected, will enable the parties to assess the claim.

(B) Information Produced. If information produced in response to a subpoena is subject to a claim of privilege or of protection as trial-preparation material, the person making the claim may notify any party that received the information of the claim and the basis for it. After being notified, a party must promptly return, sequester, or destroy the specified information and any copies it has; must not use or disclose the information until the claim is resolved; must take reasonable steps to retrieve the information if the party disclosed it before being notified; and may promptly present the information under seal to the court for the district where compliance is required for a determination of the claim. The person who produced the information must preserve the information until the claim is resolved.

(g) Contempt.

The court for the district where compliance is required—and also, after a motion is transferred, the issuing court—may hold in contempt a person who, having been served, fails without adequate excuse to obey the subpoena or an order related to it.

To: Merrill, Frank
Cc: Campbell, Drew
Subject: RE: Hobart Corp. v. DPL, Case No. 3:13-cv-115 [BRICKER-WS.FID33029]

Hi Frank,

Thank you again for providing to me the plaintiffs' lay witness list in the *Hobart* litigation. As you know, the witness list currently contains the names of four current EPA employees (Karen Cibulskis, Leslie Patterson, Steve Renninger, and me) and one former EPA employee (Tom Nash). Since your email to me of January 5th, I have been in contact with counsel for the plaintiffs and requested that the names of all current or former EPA employees be removed from the plaintiffs' witness list; while I have confirmed as of this morning that the plaintiffs are in the process of amending their lay witness list to remove the names of the four current EPA employees, it is my understanding that you wish to maintain your request for the voluntary testimony of these people, as well as for the testimony of the former EPA employee.

The regulations governing requests for EPA testimony received by EPA and its employees (and former employees) can be found at 40 C.F.R. §§2.401-2.406 (EPA's *Touhy* regulations, taken from *United States ex rel. Touhy v. Ragen*, 340 U.S. 462 (1951)). It is important to note that EPA usually does **not** allow its employees to testify in litigation in which it is not a party, unless such testimony is clearly in the interests of EPA (40 C.F.R. Section 2.403). The purpose of the *Touhy* regs, as delineated at 40 C.F.R. Section 2.401(c), is:

- (1) To ensure that employees' official time is used only for official purposes;
- (2) To maintain the impartiality of EPA among private litigants;
- (3) To ensure that public funds are not used for private purposes, and
- (4) To establish procedures for approving the giving of testimony in third-party situations.

The determination of whether providing the testimony would clearly be in the interests of EPA is made, at the Regional level, by the Regional Counsel, in consultation with the Regional Administrator and the direct supervisors of the employees involved.

In accordance with 40 C.F.R. Section 2.403, therefore, for each of the current or former EPA employees from whom you wish voluntary testimony, please provide to me in writing (1) the nature of the requested testimony, and (2) the reason(s) why EPA's providing of such testimony would clearly be in the interests of EPA.

Please feel free to give me a call if you have any questions.

Thanks,

Jim

To: Lunn, Robin
Cc: Cibulskis.Karen@epamail.epa.gov
Subject: Wayne Wertz

Robin:

Please take a look at what Mr. Wertz told our investigator.

Mr. Wertz confirmed that he had been approached several months ago by two Dayton police officers that were either retired or working on the side. They had questioned him about materials he hauled to the SDD many years ago. Mr. Wertz expressed concern that a lot of companies are likely responsible for a wide array of contamination at landfills throughout the Dayton area. He said many of these companies are out of business and will probably never be held accountable for any environmental damage. He surmised that there will probably be many occasions when calls to congressmen will relieve these firms of any cleanup responsibilities. He was hesitant to provide any information for the following reasons: he would not get anything out of it; it probably would not do any good; and because it is unverifiable.

1. Mr. Wertz confirmed information from the NASS interview report that he is presently employed by the State of Ohio. He works as a truck driver on occasion but mainly supervises other truck drivers.

2. Mr Wertz confirmed that he was employed as a truck driver by B.G. Danis from about 1972 to 1976 and with IWD from about 1976 to 1984. While with B.G. Danis, he primarily hauled debris from construction sites such as bricks, blacktop chunks, scrap metal and other waste materials that he characterized as nonhazardous. He hauled these materials to various landfills in the Dayton metropolitan area including the SDD and to an area near there across Dryden Road and over a hill next to a Dayton Power and Light (DP&L) facility. He said the SDD was located on Dryden Road south of the river and Nicholas Road. He could not identify the number of loads he actually brought to the SDD or the DP&L facility over any particular period.

3. Mr. Wertz said that, while with IWD, he was usually informed on a daily basis at the beginning of his shift as to the companies he would be hauling wastes from. This varied greatly, i.e., he might have hauled from particular locations everyday or every several days over any given period, but there were times that his scheduled pickups were not routine in terms of the locations and quantities hauled. Therefore, he could not really give any credible estimate as to the number of loads he may have hauled from a particular facility during a given time frame. In addition, he could not say how many of the loads actually went to the SDD or DP&L. He would not identify other individuals that worked for IWD.

4. Mr. Wertz stated that many of the Dayton area landfills were operated by Charlie Moore for B.G. Danis, other Moore family members, and an individual by the name of "Skip." Skip had responsibility for operating the SDD, Valley Crest and Cardington Road landfills. He said that some IWD drivers may have had keys for the SDD and/or the DP&L landfill that allowed them to enter at night.

5. Mr. Wertz confirmed that, while working for IWD, he hauled many loads of foundry sand from GH&R Foundry near Route 4 east of Route 75 to the SDD and DP&L. He said foundry sand was good cover material for other trash dumped at landfills because it could fill in the empty spaces well. Peerless Trucking and GH&R themselves also hauled the foundry sand from the GH&R site to the SDD and DP&L sites. Mr. Wertz also hauled many loads of foundry sand from the Dayton Walther facility on Fluhart Street to these landfills.

6. Mr. Wertz said that, while with IWD, many of the companies he hauled from had their own coal-fired power plants. He hauled many loads of fly ash and lamp black from these companies to the SDD and DP&L landfills. One of these facilities was the Delco plant located at about Dryden and Spring Road. It is now a facility where Chevrolet's are made. He also hauled grease and oil sludge from this facility to the SDD and DP&L landfills.

7. Mr. Wertz said that he hauled wastes from other GM/Delco facilities, such as the Inland plant, in Dayton to the SDD and DP&L sites while working for IWD. This included the downtown plant and one on Kettering. One of these GM facilities may have also been operated by Frigidaire and Harrison Radiator during different periods. The wastes he hauled from these facilities to the SDD and DP&L landfills also included fly ash in addition to oil and grease sludge. In addition, he transported to these landfills 12-15 cubic yard containers of paint that had been used to dip shock absorbers.

8. Mr. Wertz said He hauled many loads of lamp black dust from the 63-acre Dayton Tire and Rubber facility to the SDD and the DP&L landfill. He understood lamp black to be a powder-like waste that came from tire manufacturing.

9. Mr. Wertz, said that he hauled unknown wastes to the SDD and DP&L landfill from the NCR site which was a huge facility consisting of about 28 buildings. The total quantities he hauled from NCR were significantly less than the amounts from the aforementioned firms.

10. Mr. Wertz stated that he hauled an unknown amount of plaster wastes from BiMac to the SDD and the DP&L site.

11. He hauled unknown quantities of lamp black, fly ash and other unknown wastes from Kimberly Clark, aka Bergstrom Paper, located in West Carrollton to the SDD and DP&L areas.

12. Mr. Wertz stated that he believes IWD sold out to Waste Management because of liability concerns. This was because many companies did not tell IWD what was in the waste loads that were transported from these facilities.

13. Mr. Wertz was aware through hearsay that the brother of Bill Wagers was hauling a load of paint-related wastes that caught fire on his truck and killed him. Mr. Wertz was unsure if this occurred at the SDD.

Thanks, Tom

ATTACHMENT 4

South Dayton Dump Meeting

5/23/14; 8:30 AM – 1 PM

Attending	USEPA - Leslie Patterson Ohio EPA - Maddie Smith, Mark Allen CH2M HILL - Brett Fishwild, Dave Boehnker
-----------	--

Initial Thoughts

Mark – What happens if we do and do not move forward on the new AOC?

Leslie – Priority for the site overall is to 1) move forward; and 2) remember that it's an alternative site, meaning it's proposed for listing to the NPL but not listed yet, so Fund money cannot be spent on it. But USEPA could explore using the NPL listing card if need to. Remember the original risk scoring may not be up to date.

Mark – Regarding the risk scoring for the site, the backup wells for Montgomery County should be close enough to score points for groundwater use.

Leslie – We will look at the risk ranking again. Is vapor in it at all? Just groundwater use?

Roles

Leslie - OEPA is the partner agency, needed for its local knowledge, geology, and regulatory landscape. USEPA is the lead agency. CH2M HILL provides technical and hydrogeology support.

Overall Schedule

Leslie – A Special Notice is to be issued sometime in June 2014, consisting of the letter to the PRPs establishes their liability and sets the deadline (within X number of days) for entering into the RI/FS negotiations. PRPs are assumed to be receptive because they want a revised AOC. The PRP list may change in that the current PRPs may have identified more parties. USEPA is assuming that AOC negotiations will take place over the summer of 2014, with a new AOC identified in the fall of 2014. There would then be a new list of deliverables, more so for OU2 than OU1.

OU1 Schedule

Leslie – The RI/FS would be conducted through to the summer of 2016, with the Proposed Plan ready by late 2016, and the ROD in 2017. This schedule assumes a presumptive remedy is prepared after the Phase 1B/2A work and a 25- to 30-day TAT on reviews. The FS in early 2016. Is there an urgency to get a cap on the OU1 landfill?

Mark – Time is not the biggest driver; rather, getting it done right the first time is. Remember that originally this was a direct contact risk only to the central 30-acre area. Is this still applicable? USEPA's response at that time was that the 30-acre direct contact cover was not sufficient and that all of OU1 should be covered with a cap.

Leslie – PRPs do not want to pump and treat all groundwater at OU1. If they can address sources, they could reduce the overall effort to a smaller groundwater capture of contaminant plumes.

Mark – OEPA would be interested in PCBs being delineated better. Results were below lab quantitation limits but they were detected (i.e., between MDL and RL). High pH is needed to mobilize PCBs. The fact that they were detected in multiple monitoring wells without that high pH is a concern, especially near the river, and because of the history of transformer dumping at the site.

Dave – We should check the turbidity from those samples then, as a mobilizer of PCBs in lieu of high pH.

OU2 Schedule

Leslie – First, the OU2 RI/FS work plan should be revised to have the full suite of deliverables in the SOW. The RI/FS will go through to spring 2017, with the Proposed Plan ready by fall 2017, and the ROD in 2017/2018.

Mark – What happens if the renegotiations are not successful? What happens if there is no good separation of OU1 and OU2? Is there overlap of the landfill into OU2, for example?

Leslie – Defining the separation is tricky because fill extends across the OU1/OU2 boundary.

Mark – The landfill permit itself isn't the main driver for this decision of where OU1 and OU2 split, mainly used for ARARs.

Leslie – but the boundary may impact what the presumptive remedy extents are.

Overall Thoughts

Mark – The overall goal for the site is to define a disposal area as OU1, and contaminated media outside of that as OU2.

Leslie – Does the 30-day TAT for reviews work for you?

Maddie – Yes, even with other experts as part of the review team.

Leslie – This TAT then allows us to get comments back to PRPs in 45 days, which is important because all these review days add up in the overall schedule. However, it is understood that the review time also depends on the number and type of comments received.

Mark – The quality of the submittal affects the TAT too.

Leslie – this issue of the quality of the deliverable and the review process will be written into draft SOW. After review comments by USEPA, the PRPs will have reasonable time to address comments. If the document is still deficient, there are three options: 1) fix it ourselves; 2) approve the document conditionally if appropriate; 3) have the PRPs fix it again. The new SOW will also require a Response to Comments attachment be submitted with the revised deliverables to better track the review comments.

The Site

Leslie – Presumptive remedies are for municipal landfills. If part of the landfill isn't municipal, then what is the driver for that area?

Mark – The landfill is not "closed" because there was no application or closure plan or closure process followed. Therefore, the current landfill rules apply.

Leslie – Historical documents seem to indicate the landfill is closed.

Mark – However, when the owners said they would stop taking waste, they didn't actually go through closure.

Leslie – As reviewed in a legal procedure today, would it pass the practicality test to say it's not "closed?"

Mark – The Ohio legal counsel would argue that it's closed.

Leslie – What about the foundry sand site – same as the rest of the disposal site? This (the foundry sand site) is also documented as unlicensed.

Mark – this ARAR issue should be relevant and appropriate.

The group then reviewed the historical aerial photos.

Leslie – Does the SOW need to specify ARARs? We use potential ARARs until the Proposed Plan.

Maddie – Based on information in the 1968 letter and adding up the acreage on the maps, the site consists of 45 acres that include the Southern Parcels. OEPA is concerned about splitting the landfill by operable units.

Mark – ARARs apply to OU2, so it would not be necessary to do a risk assessment in OU2. The entire permitted landfill includes portions of OU2.

Leslie – Tom Nash (USEPA legal) wants to do an ARARs analysis. He needs to see specific citations.

Mark – We can always do a waiver where there is no waste (referring to OU2). See also the 6-page letter that OEPA sent to USEPA (the “Garland Letter”). It makes sense to dig up OU2 waste/fill and use it as fill for the OU1 cover anyway because the PRPs will need so much material to bring it to grade, which would result in digging and capping OU2 anyway.

Leslie – Should we just get rid of the OU1/OU2 split and/or do just do a site-wide RI/FS?

Dave – If we did that, would the OU2 risk sampling be unnecessary?

Leslie – This raises some issues, but yes, that risk sampling may then go away.

Maddie – OEPA’s concerns would be: 1) does the landfill permit cover OU2; 2) what ARARs apply; 3) is the landfill considered “closed”?

Leslie – To help USEPA and Tom Nash answer these questions and look at ARARS, we would like OEPA to provide a list of which specific citations apply, an explanation of why they apply, and what the result of that application means.

Valley Asphalt Drums

Mark – Remember that when VA was trenching to install a new sewer, they found buried drums. They then made a circuitous route around that area to finish the sewer. It is likely that drums are still there.

Leslie – What do you propose should happen?

Maddie – The drums that were found contained mixed waste and the Emergency Response group addressed them. Now it’s a DERR site. It was understood that someone would go back and look for the rest of the drums that are presumed to be still buried.

Leslie – But even if there are still buried drums, after all this time it does not appear that any contents are mobile. Not much is showing up in nearby monitoring wells.

Mark – But impacts are in the groundwater. After the drums are investigated we may find that they don’t need to be removed; but regardless the drums need to be investigated and the contents tested. Even the SOW that USEPA issued says this.

Leslie – Where in the SOW is this stated?

Mark – OEPA is only asking for a drum investigation in this spot, not an investigation over the entire site.

Brett – So the only hot spot investigation item in question is this one spot?

Mark – Yes.

Leslie – This may be an issue OEPA and USEPA end up not agreeing on; more consideration is needed.

Remedial Investigation

Leslie – How groundwater control is handled has been an issue up to now. Would combining OU1 and OU2 help resolve this issue?

Maddie – Combining the shallow and deep monitoring would help.

Leslie – What do we do with the deep groundwater then? Perform MNA and risk it out?

Mark – We will need a contingency if the hot spot investigation and mitigation doesn’t work. We may want to also consider a pumping system at the bottom of the waste to cut off migration of leachate from the shallow to the deep aquifer.

Quarry Pond

Mark – Due to the periodic flooding, the PRPs will still need to do an ecological risk assessment of the quarry pond.

Leslie – The pond is in OU2, which at present requires a full RI. But if we go to a site-wide, combined OU, presumptive remedy approach, then a full RI would not be conducted.

Mark – An ecological risk assessment of the pond would still be needed.

Brett – The current PRP plan is to collect samples from the pond anyway, so maybe additional sampling to satisfy this issue can be added to a Valley Asphalt drum investigation if that ends up being completed?

Group – Discussion on whether the pond would be included in the presumptive remedy or not, if a site-wide approach were pursued. Is the current OU2 RI/FS work plan sampling of the pond sufficient to address these OEPA questions? Yes, in part. However, either way, the PRPs will need to delineate the extent of waste at the north end of the pond, and possibly on the east side too. And they will need to collect ecological risk samples in the pond.

ATTACHMENT 5

**MEETING MINUTES**Reference No. 038443-62-03

PROJECT: South Dayton Dump & Landfill - Vapor Intrusion Mitigation

RE: Weekly Status Call

LOCATION: Teleconference

DATE: July 24, 2014

TIME: 2:30 pm ET

Participants:

Steve Renninger	USEPA	Maddie Smith	Ohio EPA
Lauren Foster	Tetra-Tech	Jim Campbell	ITW
Wendell Barner	TRW	Adam Loney	CRA
Valerie Chan	CRA		

Distribution:

<input checked="" type="checkbox"/> File	<input checked="" type="checkbox"/> Participants	Ken Brown, ITW	Tom Hut, PHDMC
Leslie Patterson, USEPA	Bryan Heath, NCR		

Item	Description	Action By
1	Roll Call	CRA
2	Status of Property Access: <ul style="list-style-type: none"> <input type="checkbox"/> No additional mitigation work has been completed due to prohibited Site access to properties owned by the South Dayton Remediation Trust. <input type="checkbox"/> The lawyers for the Respondents and South Dayton Remediation Trust have discussed the issue regarding access. The lawyers for the Respondents are preparing letters summarizing the available information to be distributed to the tenants and South Dayton Remediation Trust. In the letters, the South Dayton Remediation Trust and tenants will be presented with the choice to complete additional mitigation work or proceed with indoor air proficiency sampling only. <input type="checkbox"/> USEPA requested a copy of a letter to review prior to finalization. CRA will provide a draft to USEPA. 	CRA / USEPA
3	VI Mitigation Status: <ul style="list-style-type: none"> <input type="checkbox"/> In Buildings 8 and 9 (B&G Trucking), Building 12 (Overstreet Painting and S&J Precision), and Building 15 (SIM Trainer), sub-slab (SS) concentrations less than Ohio Department of Health (ODH) screening levels have not been achieved. <input type="checkbox"/> As a result, the Upgraded Indoor Air (IA) sampling plan will need to be strengthened, i.e., collect IA samples in rooms where samples from SS probes exceeded ODH levels; collect samples when no doors are open; revise and strengthen the Standard Operating Procedure. <input type="checkbox"/> CRA noted that sampling may be required to be completed on weekends in response to USEPA's proposed Upgraded IA sampling plan. <input type="checkbox"/> USEPA requested that Upgraded IA sampling plan language be included in the previously-mentioned letter to the tenants and the South Dayton Remediation Trust. 	CRA

Item	Description	Action By
3	VI Mitigation Status: (cont'd.) <input type="checkbox"/> Deliverable: CRA will provide a figure for each building (Buildings 8, 9, 12, and 15) with rationale for Upgraded IA sampling plan locations. <input type="checkbox"/> Bldg 24 (Globe Equipment): <ul style="list-style-type: none"> - Building 24 is not owned by the South Dayton Remediation Trust. - 365-day proficiency sampling is scheduled for August 21, 2014. - USEPA will collect split samples. - Deliverable – Provide USEPA with map of Building 24 proficiency sample locations. 	
4	Methane Monitoring: <input type="checkbox"/> 1.1 to 1.7% methane was measured at GP-2, less than the trigger condition for increased monitoring <input type="checkbox"/> 0% methane was measured in Building 15 (SIM Trainer). <input type="checkbox"/> The values of methane were lower in the charcoal filtered readings than the non-filtered readings, indicating chlorinated solvents are involved in the chemical make-up. <input type="checkbox"/> Deliverable – Redistribute the Draft Utility Corridor sampling addendum to USEPA	
5	Next steps/Other Business: <input type="checkbox"/> Next Call: August 7, 2014 at 2:30 PM ET/1:30 PM CT. <input type="checkbox"/> All parties agree to keep bi-weekly conference call schedule.	USEPA / CRA
